

This ordered list of 132 frequently used words represents more than half of all words used in a typical writing sample of English and the first ten words represents about one fourth. The script in this example was written normally without the vowels but they were drawn in lightly afterwards for illustration.

the be to of and a in that have I it is was for not on with as he has you do at this but are

his had by from they we say her she or an will were my one all would been there their what so said up out if

about more who get which go me when make did can like time no just him know may take people into

year your good some could them see other than then now look very only come here its over think should

also back after use two how our well down work first made way even new want because got where any

being these those give day most between us much many must before big cat little dog long have saw
